

Summer 2021 Covid-19 protocol for safety – We will be following best practices as recommended by the CDC and the local health department.

- Our studios, bathrooms and lobby are thoroughly cleaned on a regular schedule.
- We have scheduled time between each class to be able to clean before the next group enters the building. We will sanitize barres, door handles and frequently touched items between each group.
- Limited number of dancers in each class - maximum 12 in the small studio; 18 in the large studio. We will be staggering class times when necessary to keep numbers entering/exiting safe.
- Students in afternoon and evening programs should arrive no more than 5 minutes before class is to begin. Younger dancers can be brought to door of the building by parent and handed off to a staff member. After class, parents will wait on porch and a staff member will bring dancers to door for pick-up. You must be ON TIME for pickup, please.
- For our older dancers in Groups 1,2,3&4, only dancers will enter the building; parents are to drop off and when picking up to stay out of the lobby. Please be on time to pick up your dancer; older dancers will exit the building immediately after class.
- If a parent needs to visit the front desk, please wait for dancers to enter class to help us keep social distancing in place.
- Dressing rooms will be used to store dance bag and supplies. Dancers need to dress at home **before** arriving. Please have your dancer completely dressed for class only needing to put on their ballet shoes. Remember to wear a coverup.
- Restrooms are limited to one person at a time.
- If you use hand sanitizer we encourage you to bring a small bottle. We will have hand sanitizer available and will be encouraging our dancers to wash hands or use sanitizer before entering the classroom.
- All dancers should bring a bath/beach towel for sitting on the floor.
- Masks: we are requiring all students and anyone entering the building to wear masks at all times.
- Please do not send your child for class or come into the building if ill or show any Covid type symptoms. Using common sense will help protect us all.

Let's be safe!
